Active and corresponding members of the Academy of Sciences Kazakh SSR, in accordance with Article 18 of the Academy's Charter, conduct their scientific work in accordance with the work program established for the Academy, take direct part in the scientific work of the Academy, and are responsible for the training of personnel.

In accordance with Article 16 of the Charter, active members may be elected from among that class of scientists who have enriched Soviet science with research of immediate scientific significance and which furthers socialistic construction in the Kazakh SSR.

In accordance with Article 17 of the Charter, corresponding members may be elected from among that class of scientists who have accomplished important scientific works furthering socialistic construction in the Kazakh SSR.

In accordance with Article 21 of the Academy's Charter, scientific organizations, societies, and individual scientific personnel, as well as groups of scientific personnel, have the right to submit in letter form, within a 2-month period following the publication of notice of vacancies, the name of a candidate, along with the recommending authority, and a statement as to whether the candidacy is for active or corresponding membership.

The following documents (in triplicate) must accompany each letter recommending a candidate: biography, completed questionnaire form, list of scientific works and detailed statements on the significance of such works to Soviet science and socialistic construction in the USSR and in the Kazakh SSR, characteristics of the candidate and membership in societies, and a 9 x 12 centimeter photograph.

No notice of candidacy will be accepted unless accompanied by all of the above stipulated forms and documents.

All correspondence is to be addressed to Alma-Ata, Ulitsa Kirova 89, Academy of Sciences Kazakh SSR.

The Division of Aspirants, Academy of Sciences Kazakh SSR, located at Ulitsa Kirova 89 in Alma-Ata, announces special classes to be conducted at scientific research institutes of the Academy, where students may study on either a full-time or a part-time basis.

Courses will be given in the following specialties: geology, paleontology, hydrogeology, mineral fuels, extraction from stratified mineral deposits, open-pit mining techniques, mine ventilation, dust control in mines, mining, metallurgy of heavy nonferrous metals, ore dressing, refractory materials, construction ceramics, glass, chemistry of petroleum, chemistry of mineral fertilizers, physical chemistry, hydrology, hydroelectric power engineering, physics of heat processes, wind power engineering, economic geography, general geography (study of countries), automobile operation, construction of automobile roads, earthquake proof structures, astrophysics, actinometry.

Also, atmospheric optics, photometry, spectral analysis, cosmic rays, astrobotany, mechanics, soil geography, soil chemistry, phytopathology, timber studies, geobotany, flora and systematics of plants, ichthyology, hydrobiology, entomology, genetics of farm animals, physiology of farm animals, health resort studies, hygiene (silicosis), biochemistry, clinical physiology of the higher nervous system, industrial microbiology, history of the Kazakh SSR, archaeology, history of the Kazakh language, dialectology, experimental phonetics, Kazakh literature of the

Soviet era, history of Kazakh literature of the 18th and 19th centuries, industrial economy, agricultural economy, civil law, dialectics and historical materialism, dramatics, music studies, Uigur language, and history and theory of architecture.

The length of the courses is 3 years full time and 4 years on a part-time basis.

Only students under 40 years will be permitted studies on a full-time basis, but there is no age restriction for studies on a part-time basis. In both cases, students must have completed higher school education and must show an aptitude for scientific research work.

Those who wish to attend the courses should submit the following documents and forms prior to 1 September 1951: completed application form, notarized copy of diploma showing successful completion of higher school education, personal history statement of the applicant noting the last place of employment or education, health record, and three photographs.

Entrance examinations will be held from 1 August to 1 October 1951, and will include tests in the following fields: specialty in which the applicant is interested, basic Marxism and Leninism, and foreign languages. Students intending to attend on a full-time basis will be provided with room, board, and living expenses (no provisions for families).
